SUMMARY

Motivated and detail-oriented ~~BS Computer Science student (currently pursuing, expected graduation 2026)~~ with a strong foundation in data science, analytics, and machine learning. Skilled in Python, SQL, and data visualization (Pandas, Matplotlib) with hands-on experience in academic and personal projects. Passionate about uncovering insights from data to support decision-making. Eager to apply analytical skills in a professional environment, contribute to impactful projects, and continue developing expertise in data-driven problem solving.

TECHNICAL SKILLS

Programming & Web Development: Python, C Sharp, ASP.NET, Django, HTML, CSS

Databases & Tools: SQL, Microsoft Excel, Git

Data Science Skills: Data Cleaning & Preparation, Exploratory Data Analysis (EDA), Data Wrangling, Pandas, NumPy

Visualization: Matplotlib, Seaborn

Machine Learning: Scikit-learn

PROJECTS

Comprehensive Blogging Platform

Jan 2024 – Dec 2024

Django Project

Django, Python, HTML, CSS

- Developed a user-friendly blogging platform to empower users in content creation and management
- Implemented core features including user authentication, post creation, editing, and commenting
- Gained hands-on experience with Django framework and full-stack development practices

Netflix Data Analysis

Jul 2025 – Aug 2025

Data Analysis Project

Python, Pandas, NumPy, Matplotlib

- Performed data cleaning and exploratory analysis to study content trends, ratings, and categories
- Created visualizations to highlight insights such as growth of TV-MA content and movies vs TV shows distribution
- Revealed Netflix's strategic shift toward TV-MA content, identified global distribution trends, and delivered visual insights into audience rating patterns

Customer Churn Analysis

Jun 2025 – Jul 2025

Exploratory Data Analysis Project

Python, Pandas, Matplotlib

- Analyzed telecom customer dataset to identify key patterns and factors related to churn
- Performed data cleaning, handling of missing values, and transformation for accurate insights
- Created visualizations to reveal customer behavior patterns such as tenure, contract type, and payment methods influencing churn

Voice Control Robotic Arm

Jan 2025 – May 2025

Group Project

Python, OpenCV, Whisper, SVM, Arduino

- Collaborated in a team to develop a robotic control arm system capable of executing voice commands (e.g., "pick the red box") using OpenAI Whisper for speech-to-text
- Implemented color detection and classification with Support Vector Machine (SVM) and OpenCV to recognize red, green, and blue objects
- Contributed to designing the computer vision pipeline (HSV masking, object detection, and box tracking)
- Integrated the system with Arduino for robotic arm movement and object manipulation
- Demonstrated teamwork in building an end-to-end ML + Robotics solution combining audio processing, machine learning, and hardware control

EDUCATION

Bachelors of Science in Computer Science
MITE

Karachi, Pakistan
2023 – Dec 2026

Intermediate in Pre-Engineering
The MAK SHSS

Mirpurkhas, Pakistan
2020 – 2022

ACADEMIC COURSEWORK & PROFICIENCY

- Introduction to ICT – Strong
- Programming Fundamentals – Good
- Object-Oriented Programming – Strong
- Database Systems – Good
- Data Structures & Algorithms – Good
- Artificial Intelligence – Intermediate
- Software Engineering – Intermediate
- Machine Learning – Good

CERTIFICATIONS

- CIT – Certificate in Information Technology
- OAP – Office Automation Program
- DIT – Diploma in Information Technology
